## OBJECTIVE

I am seeking experience in a professional work environment. Looking for opportunities to work in a team, collaborate with other team members, and gain practical experience in software development.

## SUMMARY

A highly motivated and results-driven Computer Systems Engineer with 2 years of experience in web development and mobile application development. I have developed mobile apps using Android Studio and the Unity Engine. Possess a strong ability to analyse user needs and develop software solutions to meet those needs. I am proficient in Java, JavaScript, SQL, HTML, CSS, and possess basic knowledge in React JS and Flutter.

## EDUCATION

Degree: Bsc (Honours) in Computer Systems Engineering

Tertiary Institute: University of Sunderland

Course Duration: August 2017 to August 2021

## SKILLS

- Proficient in full-stack web development using HTML, CSS, JavaScript, SQL, MySQL and Oracle Database with basic knowledge in React JS
- Proficient in mobile application development using Android Studio, the Unity Engine with basic knowledge in Flutter
- Experienced and knowledgeable in the entire software development cycle including planning, requirements gathering, design, implementation, testing, deployment and maintenance
- Familiar with the Agile software development methodology

- Very adept and experienced at learning new languages, frameworks or tools at a quick pace if necessary
- Strong analytical and problem-solving skills
- Excellent communication and teamwork skills
